## SKILLS

---

- ❖ Frontend (HTML, CSS, JavaScript, TypeScript, Frameworks: React, Angular, Ember, Vue/Nuxt, etc.)  
Backend (SQL, MongoDB, Bash, APIs, microservices), Java, Python, Next.JS
- ❖ Tools: Git Version Control, Figma, [Node.js](https://nodejs.org/), Jenkins CI/CD, Adobe Creative Suite
- ❖ Strong technical writing, time management, communication, organization, and collaboration skills.

## PROFESSIONAL EXPERIENCE

---

### Lingoport, Inc.

Boulder, Colorado

Software Engineer

January 2022 – Present

- Internal Product Development:
  - Developed, tested, documented, and promptly shipped various software deliverables in line with the company's product development roadmap.
  - Attended weekly standups, meticulously managed bugs, and collaborated closely with other members of the development team as needed.
- Software Internationalization (i18n) Services:
  - I collaborated with large-scale client companies to identify and refactor thousands of i18n software issues (over millions of lines of code) to bolster their globalization goals as the lead i18n software engineer.
  - Organized and led teams of up to 8 other engineers to quickly adapt to various in-house programming styles and deployment pipelines to ensure a smooth and non-intrusive i18n implementation.
  - Created extensive technical documents, i18n code guidelines, and videos for client training purposes and trained new engineers on the Lingoport technology suite.

Intern

May 2021 – December 2021

- Wrote, tested, and shipped custom Bash shell scripts in accordance with clientele requests.
- Researched, developed, and tested several web application prototypes to assist in the integration of external code management software with internal company software.

### Insights Intervention

Boulder, Colorado

Front-End Developer & Designer

August 2020 – May 2021

- Collaborated with four other students using an agile development methodology to develop a new companion mobile application to provide useful information to parents, teachers, and kids. Technologies used: React Native + Expo (Development), Figma (Design), Balsamiq (Prototype)
- Additionally identified and refactored over 30 unique user experience enhancements on the client's primary website.

## PROJECTS

---

### Figma Plugin - Lingoport Localyzer

October 2022 – March 2023

Figma, HTML, CSS, JavaScript, Typescript, REST API, Webpack

[Plugin](#) | [Demo](#)

- Designed, developed, and published a Figma plugin that connects with internal company software to allow users to translate their designs quickly and efficiently into different languages.

## EDUCATION

---

University of Colorado Boulder - Boulder, CO

August 2017 – December 2021

Major: Computer Science, Bachelor of Science

Minor: Creative Technology & Design
